Security Information

7. On 10 January, the SS Kaserne at Droegen, 4 km south of Fuerstenberg, was occupied by troops who wore red-bordered black epaulets. Several groups of soldiers received small arms drill in the barracks yard. Some of the doors of the garages stood open, and the garages seemed to be filled to capacity.

- * Comment. The restricted area in the center of Fuerstenberg is possibly a residential area of villas which is bounded by Wallstrasse, Schwedtseestrasse and Baalenseestrasse and which contains a signal communication center operated by components of the 9th Sig Regt of the Second Gds Mecz Army. The four antenna masts mentioned in the present report and the presence of troops with black-bordered black epaulets confirm the signal center.

- ** Comment. The information on the other military installations in Fuerstenberg generally agree with a report of mid-December 1951.

50X1-HUM

However it is significant that no vehicle of the 34th Gds Mtz Rifle Regt of the 12th Gds Tank Div should have been observed in the SS Kaserne, Droegen, where the regiment has been carried to date. The vehicles mentioned in paragraph 7 of the present report belong to army headquarters troops, including engineer troops, and the rocket launcher battalion of the 12th Gds Tank Div which is quartered in the Friedrich Franz Kaserne, Neuruppin. The materiel of the rocket launcher battalion is stored on Schottenplatz.
